**Percent Susceptibility**

- Beta-lactams: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Carbapenems: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Quinolones: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Aminoglycosides: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.

### Cephalosporins
- Carbapenems: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Quinolones: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Aminoglycosides: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.

### Enterococcus, Acinetobacter
- Beta-lactams: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Carbapenems: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Quinolones: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Aminoglycosides: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.

### Enterobacter aerogenes
- Beta-lactams: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Carbapenems: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Quinolones: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Aminoglycosides: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.

### Acinetobacter
- Beta-lactams: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Carbapenems: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Quinolones: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
- Aminoglycosides: Interpret according to cefoperazone/sulbactam in Enterobacter, Enterococcus, and Acinetobacter.
